

## MediPen Press Release

# The MediPen® is the UK's first legal "Cannabis Vaporiser"

Creators say their revolutionary device contains a very respectable dose of CBD, an active ingredient in the Cannabis plant with a vast array of positive benefits. CBD does not produce any of the psychoactive effects associated with traditional Cannabis use.

The first all-natural Cannabis Vaporiser is now available in the UK, and it's creators 'MediPen' say their new device is a completely legal and harm free way to unleash the miraculous health benefits of Cannabis.

The active ingredient inside the MediPen is called Cannabidiol, also known as CBD. Cannabidiol has a vast array of powerful pharmacological applications and is used in over 22 states in America legally to help people suffering from serious medical conditions, as well as everyday people who just want an easier way to relax and clear their minds.

The MediPen contains a blend of Cannabidiol (CBD) & Pharmaceutical Grade Coconut Oil. The CBD is extracted from a cutting edge medicinal strain of the Cannabis plant and does not contain any THC ( $\Delta 9$ -tetrahydrocannabinol), the illegal substance found in Cannabis.

As The MediPen does not contain any THC it is completely legal in the UK and does not produce any of the negative mind-altering effects associated with traditional Cannabis use.

You can purchase a MediPen starter kit from their website today [www.medipen.co](http://www.medipen.co) for £49.97

### **About MediPen**

MediPen Ltd. is a British company and its creators say their number one goal is to educate the general public on the vast array of health benefits associated with CBD. MediPen Ltd. obtain their 100% natural ingredients from responsible sources within the UK and EU as they're firm believers in the principles of sustainability and promoting eco-friendly production.
